

# Sustainability Management Course

University Certified Sustainability  
Management Course

**htw saar**

**sikos**

# Unique Cooperation Between Highly Experienced Partners

The brand new university-certified Sustainability Management Course for key personnel of manufacturing industries is the result of an innovative new cooperation between three experienced partners: University of Applied Sciences htw saar, education and qualification partner sikos GmbH, and international consulting firm CSI, who has extensive practical experience in Asian supplier markets. Upon completing the 80-hour course, participants will earn a certificate officially issued by htw saar in Sustainability Management.

## Meet new legal requirements with certified Sustainability Managers

Demand for educated professionals in the area of sustainability is on the rise. The Act on Corporate Due Diligence Obligation in Supply Chains passed in Germany (Lieferkettensorgfaltspflichtengesetz – LkSG) explicitly requires designating a responsible person or persons within the enterprise to exercise due diligence in their supply chains (section 4(3)). With the Sustainability Management course, participants will be equipped to take up that role in their organisations and meet the new requirements.

## Flexible and relevant

Being offered either in German and English, in person or online, the course is first of its kind. It covers sustainability principles, aspects of business management, supply chain management, corporate social responsibility (CSR), environmental science and policy, legal requirements, climate change and more. The course will certify participants as Sustainability Managers and inspire a new generation of innovative thinkers and sustainable change makers.

## Practice-oriented course content

The course was developed based on extensive practical experience working with partners along the supply chain and directly in supplier markets. The course offers easy-to-follow guidance on how to implement sustainable practices and deal with the challenges that arise along the process within the supply chain. It provides an in-depth understanding of due diligence requirements and how to apply them in the real world. It covers social, environmental, occupational health and safety, and toxicological issues in a way that reduces risk and enables sustainable business operations to the benefit of people, company and the environment. Current topics, such as the German due diligence law, will be covered as well. At the end of the course, participants will be able to effectively manage sustainability in manufacturing industries and supply chains in a practical and straight-forward way.

## State-of-the-art course by German university – Globally available

The course is offered either in German or English. It can quickly and easily be offered to interested participants around the world thanks to optional digital teaching mode. The course is the first of its kind to offer the level of official academic accreditation as well as easy availability and distribution in German or English, in-person or online, all over the world.

"The practical focus of the course allows participants to directly apply sustainability in their respective industry. Thanks to the flexible teaching modes, the course can easily be taught to participants around the globe."

## Flexible teaching options:

- Language: Either German or English
- Teaching mode: Either Digital, In-Person or Hybrid Mode

## Opportunity for partnership

Associations are able to offer the course to their members.

Brands and retailers can use the course to get their teams in Germany trained in Sustainability Management. Besides that, they can provide the course to staff along international sourcing offices, and even at key suppliers.

As the practice-oriented content can be applied in different industries, such as automotive, chemical, pharmaceutical, aviation, food, engineering and more, it is ideal for companies in the indus-

trial sector looking for practice-oriented and relevant training for their staff. They can provide the course for their teams at the headquarters, to staff in international offices as well as to key suppliers.

# A Strong Network Of Experienced Partners

## htw saar

**htw saar** (University of Applied Sciences Saarland, Germany) is considered to be one of the top-ranked universities of applied sciences in Germany. htw saar is one of the leading application-oriented university in Germany conducting research, carrying out research on an international level and with industry partners from all over the world.
